Profile

Aspiring software engineer with hands-on experience in Python, C, Java, JavaScript, and React. Skilled in building web applications, collaborating in student-driven Agile teams, and solving practical problems through technology. Actively seeking an internship to deepen engineering experience and contribute to real-world development work.

Experience

Creative media activist - IMCB   2023 – 2024
- **Designed** and **managed** IMCB's Instagram content using Canva, improving engagement across announcements and information posts.
- **Coordinated** with team members to create consistent branding and visual identity for the organizations.

Student Participant - ICDP   2023 – 2023
- Worked with SMEs to understand operational challenges and contributed to designing actionable solutions.
- **Collaborated** in a multicultural team to solve real-world problems, strengthening analytical and communication skills.

Time Keeper — IMCB Welcoming Party 2024   2024 (Event Role)
- Ensured all activities and agenda items for a **109-attendee** event ran on schedule.
- Coordinated with committees to **maintain** smooth event flow and prevent delays.

Education

- **Computer Science – Binus University**   2023–Present (Expected 2027)
- **Science Major – SMA Kristen YSKI**   2020 - 2023

Projects

Social Networking Web Application — KeSapian | TSX, Node.js, MySQL, Figma, Tailwind CSS
Full-Stack Developer
- Built the Login and Register pages with form validation and secure authentication logic.
- Implemented the Preferences system for interest-based personalization.
- Developed the **User Suggestions** feature using shared-interest matching logic.
- **Collaborated** with a 4–5 person team using Git and Agile-style task division.

Creativity & Burnout Recovery Platform — KeSapian | Figma, Tailwind, React
Front-End Developer
- Designed the Subscription Page UI with a clean, minimal, and soothing layout.
- **Developed** the frontend of the Subscription Page using React and Tailwind CSS.
- Collaborated with the team to align the interface with the platform's theme of comfort and mental well-being.
